IN ZINC OXIDE
MANUFACTURING

“ We Are
Committed To
Your Success ”

“ Upper India Zinc Oxide
Brand at Work
Overtime. All the time ”

Zinc Oxide Applications

Zinc Oxide is an essential part of Tyre & Rubber, both for its chemical activity during Vulcanization and its effect on the physical properties of the finished rubber goods.

Zinc Oxide is used in Ceramics as a fluxing agent in the preperation of frit and Enamels.

Zinc Oxide often finds the application in Paint and Pigment Industry and helps in providing anti-corrosive coating for different metals.

Zinc Oxide also has micro-nutrient properties and is used in dietary supplements and vitamin tablets.

Zinc Oxide rich minerals increase crop productivity and life. Zinc rich nutrients are used for animal feeds as they form an integral part of the enzyme system of the body.

About Us

Upper India established its first unit in the year 1959 and marked its presence in India and Global market as a leading manufacturer and exporter of a comprehensive range of Zinc Oxide products.

On account of our diversified industrial experience, we have been successful in meeting the emerging market demands accurately and deliver a product that conforms to the highest level of Industry Quality Standards.

Our chemical compounds find their applications in the production of Tyres & Rubbers, Glass & Ceramics, Cosmetics, Footwear, Zinc based chemicals, Agriculture & Animal feeds etc.

Our Mission

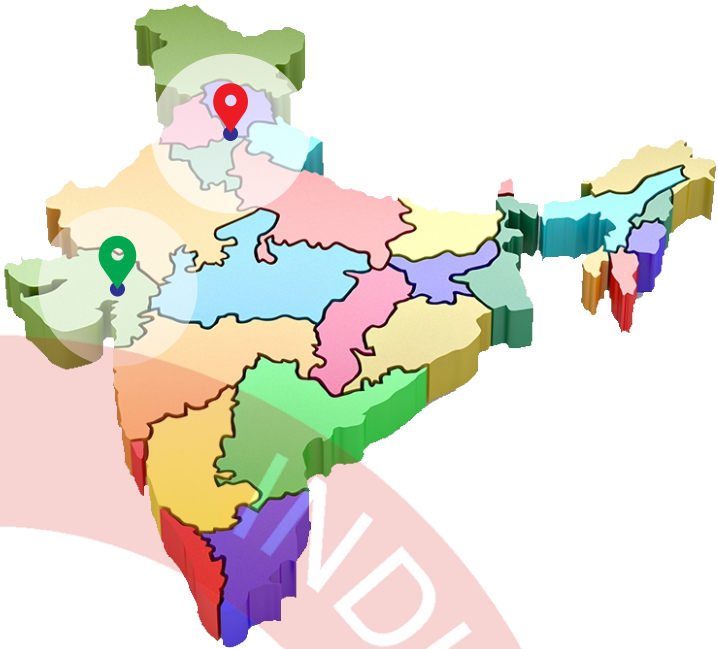

- 1 To emerge as the most dependable supplier of ZincOxide worldwide.
- 2 To maintain a consistent quality of the product and improve upon it, ensuring its availability at cost-effective price.
- 3 To strive hard to exceed the expectations of our esteemed customers, each time and every time, with strong focus and dedication.

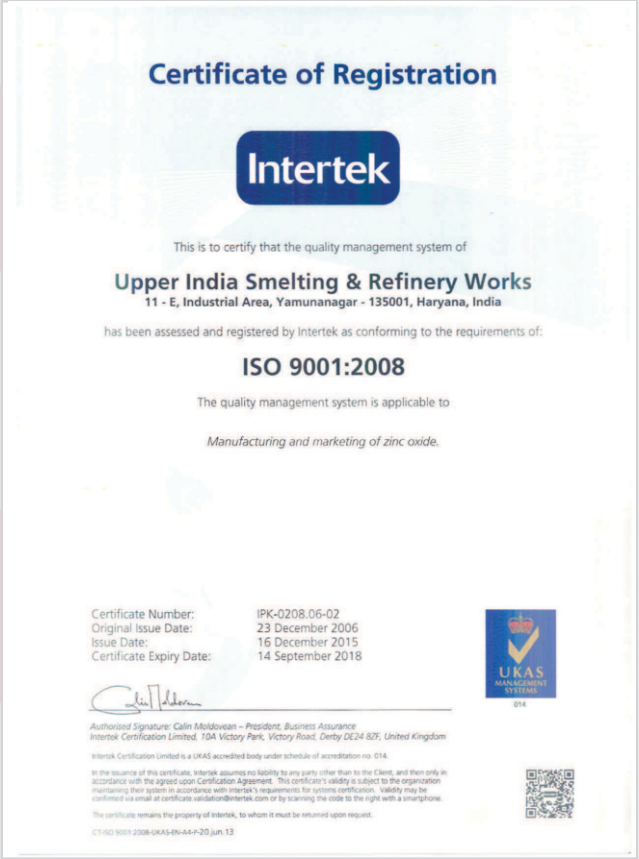

Our Presence

We are running two manufacturing units in India successfully. First unit is situated 200 Km North of New Delhi at Yamuna Nagar, Haryana. The second unit is situated 40 Km North of Ahmedabad at Chhatral, Gujarat.

Our Certifications

Zinc Oxide For Products

Zinc Oxide plays an important role in a very wide range of applications varying from Tyres to Ceramics, from Pharmaceuticals to Agriculture and from Paints to Chemicals.

Zinc Oxide Grades	Applications
UI I	Cosmetics, Plastics, Chemicals, Glass & Ceramics, Enamels
UI II	Paints, Lubricant & Greases
UI III	Tyres & Rubbers
UI IV	Agriculture & Animal Feeds

Quality Control

- ✓ Atomic Absorption Spectrophotometer
- ✓ Optical Emission Spectrophotometer
- ✓ Surface Area Analyzer
- ✓ pH Meter
- ✓ Conductivity Meter
- ✓ Hot Air Oven for Volatile Matter
- ✓ Muffle Furnace for Ash Content
- ✓ Sieve Apparatus
- ✓ Relative Density, Bulk Density
- ✓ Digital Weighing Balance
